

# **Ibero-American Immersion in Endoscopic Spine Surgery: HispanoHablantes**

**A course designed for those  
wishing to begin or perfect their  
skills in spinal endoscopy, with  
Spanish-speaking tutors who are  
benchmarks in their countries.**

The Brazilian Endoscopic Spine Surgery Center (BESSC) is a renowned multidisciplinary group dedicated to endoscopic spine surgery, whose main mission is to disseminate and develop efficient methods for teaching and practicing it safely.

More than a **technique:**  
a **philosophy!**

One of the main platforms for professional training in healthcare in Brazil, EAD Medic offers courses with excellent content and a responsive layout optimized for cell phones, tablets and computers. This way, students can study from wherever they are, regardless of the device they use!

The platform's tutors are benchmarks in their areas of expertise, and will share experiences with students through EAD Medic's teaching methodology, such as dynamic video lessons, audio content, support materials, tests, quizzes and webinars - all to make the most of each lesson.

LESSS is an international non-profit community that brings together surgeons specializing in spinal endoscopy in Latin and Central America. Our purpose is clear: to raise the standard of endoscopic spinal surgery in the region and promote its progress through scientific, academic and practical collaboration.

# Who is this course for?

Neurosurgeons and orthopedic spine specialists who want to learn or further develop this technique.

# 100 participants

## Mandatory requirements

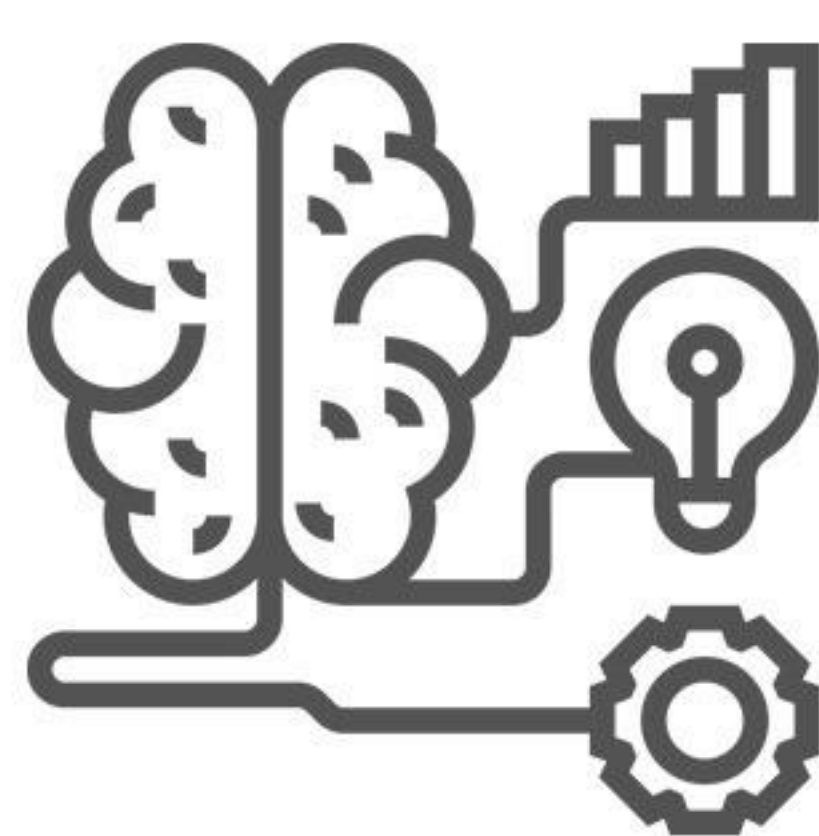

To join the course, students need to be a doctor registered with their state council and a neurosurgeon or orthopedist who has completed or is completing their training.

## Renowned trainers

Classes with tutors who are benchmarks in their fields.

## Dynamic Content

All the content is delivered dynamically, ensuring greater absorption of knowledge of the lessons.

## Complete support material

Videos, animations, podcasts, bibliographic references and support materials in PDF with access via cellphones, tablets and notebooks.

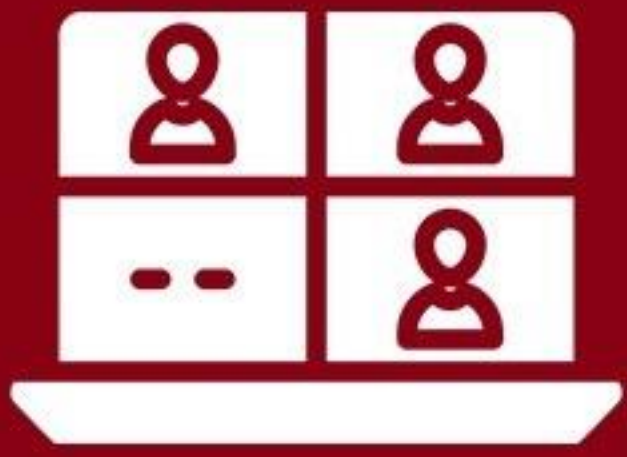

# Differentials

## Exclusive

Exclusive course on the Medic distance learning platform.

## Webinars

For greater interaction with the student during the course, webinars will be held to discuss cases, where it will be possible to ask questions of the tutors

## A lot of immersion

The practical training is 100% focused on executing all the theory previously absorbed.

Activities will be done on MetaQuest 3 and at the end each student will take it home.

Each student will receive one year's free LESSS membership

Up to 4 hotel days with 1 companion included in the price.

All students will become part of the BESSC academy.

Course completion certificate signed by all tutors.

# About e-learning

## Start of online content release: Immediately

The course consists of 20 recorded lessons and 6 live webinars given by Spanish-speaking teachers. The recorded lessons offer exclusive content, with 3D animations, detailed graphics and PDF and audio support materials, allowing students to study at their own pace and revise the content whenever necessary. From the essential fundamentals to the most advanced techniques, each module has been carefully structured to ensure progressive and effective learning. In addition, live webinars provide a unique opportunity for in-depth study, allowing direct interaction with experts, clarification of doubts in real time and sharing of experiences with other students. With this approach, our distance learning combines flexibility and excellence, ensuring that you have access to top-level teaching wherever and whenever you want.
